Author Index Volume 147 (2002)

Abd-el-Malek, M.B., N.A. Badran and **H.S. Hassan,** Using group theoretic method to solve multi-dimensional diffusion equation 385–395
Aziz, T. and **A. Khan,** A spline method for second-order singularly perturbed boundary-value problems 445–452
Azulay, D.-O. and **I. Gambini,** Which pivot to solve linear systems? 471–484

Badran, N.A., see **Abd-el-Malek, M.B.** 385–395
Bae, H.-O., see **Kim, D.W.** 99–120
Bartel, A. and **M. Günther,** A multirate W-method for electrical networks in state–space formulation 411–425
Bitterlich, S. and **P. Knabner,** An efficient method for solving an inverse problem for the Richards equation 153–173
Borovykh, N. and **M.N. Spijker,** Bounding partial sums of Fourier series in weighted L^2-norms, with applications to matrix analysis 349–368

Chan, C.-H., see **Xie, Z.** 75– 98
Chu, J.H., see **Kim, D.W.** 99–120

Diblík, J. and **Z. Svoboda,** An existence criterion of positive solutions of p-type retarded functional differential equations 315–331
Ding, J., T.Y. Li and **A. Zhou,** Finite approximations of Markov operators 137–152
Ding, X.P. and **F.Q. Xia,** A new class of completely generalized quasi-variational inclusions in Banach spaces 369–383

Gambini, I., see **Azulay, D.-O.** 471–484
Grammont, L. and **A. Largillier,** On ε-spectra and stability radii 453–469
Günther, M., see **Bartel, A.** 411–425

Hassan, H.S., see **Abd-el-Malek, M.B.** 385–395
Hausenblas, E., Numerical analysis of semilinear stochastic evolution equations in Banach spaces 485–516

Jankowski, T., Differential equations with integral boundary conditions 1– 8
John, V., Slip with friction and penetration with resistance boundary conditions for the Navier–Stokes equations—numerical tests and aspects of the implementation 287–300

Kálovics, F., Creating and handling box valued functions used in numerical methods 333–348
Khan, A., see **Aziz, T.** 445–452
Kim, D.W., J.H. Chu and **H.-O. Bae,** Perturbed integral equation method on determining unknown geometry in fluid flow 99–120
Knabner, P., see **Bitterlich, S.** 153–173
Kubiaczyk, I. and **S.H. Saker,** Oscillation of delay parabolic differential equations with several coefficients 263–275

Largillier, A., see **Grammont, L.** 453–469
Lesnic, D., The decomposition method for forward and backward time-dependent problems 27– 39
Li, T.Y., see **Ding, J.** 137–152
Liang, S., X. Ma and **A. Zhou,** A symmetric finite volume scheme for selfadjoint elliptic problems 121–136
Lupu, M. and **E. Scheiber,** Exact solution for an optimal impermeable parachute problem 277–286

Ma, X., see **Liang, S.** 121–136
Mazzia, A. and **M. Putti,** Mixed-finite element and finite volume discretization for heavy brine simulations in groundwater 191–213
Melnik, K.N. and **R.V.N. Melnik,** Optimal-by-accuracy and optimal-by-order cubature formulae in interpolational classes 233–262
Melnik, R.V.N., see **Melnik, K.N.** 233–262

Nakao, M.T., see **Toyonaga, K.** 175–190

Paris, R.B., Error bounds for the uniform asymptotic expansion of the incomplete gamma function 215–231
Petersen, V.B., Multiple zeros in frequency analysis: the $T(r)$-process 427–444
Putti, M., see **Mazzia, A.** 191–213

Saker, S.H., see **Kubiaczyk, I.** 263–275
Scheiber, E., see **Lupu, M.** 277–286
Simos, T.E., see **Tsitouras, C.** 397–409
Spijker, M.N., see **Borovykh, N.** 349–368
Svoboda, Z., see **Diblík, J.** 315–331

PII: S0377-0427(02)00689-1

Thukral, R., Introduction to the improved functional epsilon algorithm 9– 25
Toyonaga, K., M.T. Nakao and **Y. Watanabe,** Verified numerical computations for multiple and nearly multiple eigenvalues of elliptic operators 175–190
Tsitouras, Ch. and **T.E. Simos,** Optimized Runge–Kutta pairs for problems with oscillating solutions 397–409

Wang, J., see **Zhang, Z.** 41– 52
Watanabe, Y., see **Toyonaga, K.** 175–190

Xia, F.Q., see **Ding, X.P.** 369–383
Xie, Z., C.-H. Chan and **B. Zhang,** An explicit fourth-order staggered finite-difference time-domain method for Maxwell's equations 75– 98
Xu, P., A hybrid global optimization method: the one-dimensional case 301–314

Yang, S.-Y., Analysis of piecewise linear approximations to the generalized Stokes problem in the velocity–stress–pressure formulation 53– 74

Zhang, B., see **Xie, Z.** 75– 98
Zhang, Z. and **J. Wang,** The upper and lower solution method for a class of singular nonlinear second order three-point boundary value problems 41– 52
Zhou, A., see **Liang, S.** 121–136
Zhou, A., see **Ding, J.** 137–152
